

AI Usage Disclosure Form – Cognitive Claw

1. Team Details

- **Team Name:** Cognitive Claw
- **Project / Product Name:** Cognitive Claw – AI Powered Smart Safety & Assistance Platform
- **Organization / Institution:** RV College of Engineering
- **Submission Date:** 08/05/2026

2. AI Usage Declaration

Did your team use any Artificial Intelligence (AI) in developing this project?

☒ Yes

3. Purpose of AI Usage (Brief Details)

Purpose	Details
Idea generation / brainstorming	Used AI tools for refining project architecture and workflow ideas
Code generation or assistance	Used AI assistance for backend APIs, scheduling logic, AI integration, and debugging
UI / UX design	Used AI for dashboard layouts, presentation visuals, and workflow diagrams
Content creation	Generated documentation, reports, PPT content, and technical descriptions
Data analysis	AI-assisted hotspot analysis, clustering logic, and prediction concepts
Testing / debugging	Used AI tools for debugging backend routes and improving code quality
Other	AI-assisted project planning and feature structuring

4. Feature Origin Classification

Feature 1

- **Feature Name:** Incident Classification System
 - **Classification:** Both (Self-Generated + AI-Assisted)
 - **Description:** Used AI tools including ChatGPT and Python ML libraries to design NLP-based incident classification. AI assistance was used for generating model structure ideas and debugging. Final implementation, integration, and customization were modified manually by the team.
-

Feature 2

- **Feature Name:** Hotspot Detection & Heatmap Analytics
 - **Classification:** Both (Self-Generated + AI-Assisted)
 - **Description:** AI guidance was used to understand clustering algorithms such as DBSCAN and geospatial heatmap generation. Team members implemented and customized the analytics workflow for unsafe zone detection.
-

Feature 3

- **Feature Name:** Safe Route Recommendation
 - **Classification:** Self-Generated
 - **Description:** Routing logic and safety scoring mechanisms were designed and implemented by the team using geospatial analysis concepts.
-

Feature 4

- **Feature Name:** Backend API & Database Integration
 - **Classification:** Both (Self-Generated + AI-Assisted)
 - **Description:** AI tools were used for code assistance in Express.js, MongoDB connection setup, authentication, and API debugging. Final architecture and deployment configuration were completed by the team.
-

Feature 5

- **Feature Name:** Presentation & Documentation
 - **Classification:** AI-Assisted
 - **Description:** AI tools were used to generate diagrams, infographics, technical summaries, and PPT content. The team reviewed and edited all generated materials before submission.
-

5. Ethical & Compliance Confirmation

- AI usage complies with guidelines and policies.
 - No proprietary or copyrighted data was misused.
 - All AI-generated outputs were reviewed and modified by the team.
-

6. Declaration & Sign-Off

- **Name of Team Representative:** Pavan S
- **Signature:** pavan s
- **Date:** 08/05/2026
